

## *Community Broadband Survey*

The recently upgraded Earls Colne telephone exchange is now accepting orders for fibre broadband in some parts of Chappel. This is great news and will mean greater broadband speeds for households connected to this exchange.

Unfortunately properties east of the viaduct are connected to the Fordham exchange (EAFOR) are still suffering very slow broadband speeds.

In an attempt to accelerate the process of getting better broadband to these properties we are conducting a broadband survey.

The data collected in this survey will be used as the basis for approaching local officials and providers of superfast broadband with the aim to bring great broadband to everyone in the area serviced by the Fordham exchange.

Go online and take the survey here:
